GSFC DETAIL SPECIFICATION

SWITCHES, THERMOSTATIC, (BIMETALLIC), SUBMINIATURE, HERMETICALLY SEALED, SINGLE POLE, SINGLE THROW (SPST), 5 AMPERES AND LOW LEVEL

The requirements for procuring the thermostatic switches described herein shall consist of this specification, the current revision of GSFC S-311-641 and QPL-24236..

PART NUMBER:

G311P641/05  A     30 B  099  -10  -05  -20  (S)  /  1  2

(A) GSFC Prefix

(B) Configuration (See Figure 1)

(C) Low Temperature

The low temperature operating point (°F) shall be designated by 3 digits. For negative temperatures, the first digit shall be a minus (-).

(D) Contact Action

A  Open on rise, silver contacts
B  Close on rise, silver contacts
C  Open on rise, gold contacts (low level)
D  Close on rise, gold contacts (low level)

(E) High Temperature

The high temperature operating point (°F) shall be designated by 3 digits. For negative temperatures, the first digit shall be a minus (-).

(F) Open Temperature Tolerance

Use Table 1 for standard tolerance, Table 2 for special tolerance

(G) Close Temperature Tolerance

Use Table 1 for standard tolerance, Table 2 for special tolerance

(H) Differential

Use Table 1 for standard differential, Table 2 for special differential

(I) Special

Special lead attach. Consult factory for available wire types, sizes, and lengths. Omit if leads not required. See Table 4 for ordering code.

(J) Special feature code for Configuration V. Consult factory for special configurations not shown.
REQUIREMENTS:

Dimensions and configuration: See Figure 1

Storage temperature range: -80°F to 550°F (-62.2°C to +287.8°C)
Operating temperature range: -65°F to 550°F (-53.9°C to +287.8°C)

Tolerances: See Tables 1 and 2

Contact ratings: See Table 3

Contact resistance: 0.025 ohms maximum per MIL-STD-202, Method 307

Dielectric Withstanding Voltage: 1250 VAC, rms, 60 Hz for 1 minute, terminal to case, per MIL-STD-202, Method 301

Vibration: 5-2000 Hz, 20 G, per MIL-STD-202, Method 204, Condition D (monitored)
5-1000 Hz, 100G, per MIL-STD-202, Method 204, Condition D (unmonitored)
1000-2000, 50G, per MIL-STD-202, Method 204, Condition D (unmonitored)

Shock: 100G, 6 milliseconds, per MIL-STD-202, Method 213

Hermeticity: 1 X 10^-8 atm cc/sec maximum, per MIL-STD-202, Method 112, Condition C

Salt spray resistance: Per MIL-STD-202, Method 101, Condition B, 5% solution

Moisture resistance: Per MIL-STD-202, Method 106

Weight (avg): 4.8 grams basic unit; 5.9 grams with bracket

Finish: 0.0003 - 0.0004 inches Ni per AMS-QQN-290 over 0.0002 - 0.0003 inches Cu per MIL-C-14550

Wire leads: Wire lead material per Table 4.

Qualification: Qualification listing to MIL-PRF-24236/1 is required for each configuration.

Screening: Switches shall be subjected to 100% Group A screening inspection per S-311-641, Table I, Test Nos. 1-12, with the following details and exceptions:

a. PIND per manufacturer’s GSFC approved internal test procedures.

b. Creepage testing shall be performed in accordance with MIL-PRF-24236, para. 4.6.4 for three (3) consecutive cycles.

c. Switches shall be heated or cooled as required to cause thermal actuation. The rate of temperature change of the switch shall be the minimum practical to provide reliable creepage detection.

d. Tested units shall meet the requirements in MIL-PRF-24236, para. 3.9, except contact transfer time shall not exceed five (5) milliseconds.

</tbody>
</table>

Operating temperature: Temperature at which contacts close.

Differential: Subtract (for close on rise) or add (for open on rise) the differential from the closing temperature to determine the temperature at which the contacts will open.
