What's the Deal with Digital Transformation
and
Safety and Mission Assurance?

The Problem We're Trying to Solve

Evolving acquisition practices will require agile SMA policies and practices to
- Establish and adhere to criteria regarding "how safe is safe enough" and "how good is good enough" throughout a project's lifecycle
- Deal with geographically and organizationally distributed work force (mix of contractor, government, and international)
- Establish Leading Indicators
  Leverage past experience, benchmark other industrial sectors
